The diagram shows two electronic components: a Splitter and a Switch. The Splitter is a rectangular unit with two input ports on the left and two output ports on the right. It features a CE mark, a 'PX 165' label, and a 'DMS Splitter' label. The Switch is a similar rectangular unit with a 16-position rotary switch on the left and two output ports on the right. It also features a CE mark and a 'PX 257' label. The rotary switch has positions labeled 1 through 16, with 'DC' and 'Risky' labels. The output ports are labeled 'OUT 1' through 'OUT 4'. The diagram is labeled 'Splitter' and 'Switch'.
